

**PREFERRED CHOICE 3-TIER NON-FORMULARY DRUG
AND FORMULARY ALTERNATIVES LIST
October 2007 Edition**

To avoid the higher co-payment associated with non-formulary drugs, please ask your prescriber to refer to this formulary drug list when prescribing medications for you and your dependents. Please note that you will pay a higher co-payment for drugs listed in the Non-Formulary Drug column than for those drugs listed in the Formulary Alternative(s) column.

It is important to keep in mind that newly FDA-approved medications will be subject to the non-formulary co-payment pending a review by the Pharmacy and Therapeutics Committee.

Please note that this listing does not imply a guarantee of coverage, as covered products and/or categories are subject to individual plan restrictions and/or limitations.

Substitution of generic products is encouraged when available and appropriate. The drugs listed in *Italics* represent generic medications. Please note that a generic product in the Formulary Alternative(s) column may not necessarily be the generic equivalent of the non-formulary brand. It does however represent a generic alternative in the same class of drugs. **Any brand name drug for which a generic product becomes available may be designated as a non-formulary product.**

Periodic updates to the formulary may occur. For the most current formulary information, please call PharmaCare at the toll-free number printed on your prescription benefit ID card, or visit PharmaCare at www.pharmacare.com/members.
